Dear Contributors,

It is with great joy to celebrate the new issue of International Scientific Journal of Engineering and Technology (ISJET). ISJET provides an exciting opportunity for researchers to share their recent achievements and discoveries with communities of learners and practitioners across science and engineering fields. We are committed to publish up-to-date, original research articles, accessible openly through our official site <https://isjet.pim.ac.th>, or <https://www.tci-thaijo.org/index.php/isjet/index>. Our team have been working hard in this issue to sort for high-quality pieces of work. Efforts of authors, the Editorial Boards, and our contributors are much appreciated.

Needless to say that the technological landscape is advancing very rapidly. Our goal is to always ensure the flexibility of shifting perspectives across multidisciplinary approaches, while maintaining rigorous and academic standards and research ethics. Suggestions, thoughts, and submissions for future issues of the journal are always welcome.

Finally, on behalf of the Editorial Board, I would like to take this opportunity to thank everyone who has contributed to the ISJET, and to urge you to continue submit your research to publish in the journal. Your cooperation will be highly appreciated. If you have any questions or suggestions, please directly contact me or the journal coordinator at: isjet@pim.ac.th or <https://www.tci-thaijo.org/index.php/isjet/index>. I look forward to hearing from you.

With kind regards,

Dr. Nattakarn Phaphoom

Associate Editor of Information Technology
